

UniKL emphasises on success in researches and development for commercialisation.

Safeguarding the future

UNIVERSITI Kuala Lumpur, better known as UniKL, is a university wholly owned by Majlis Amanah Rakyat (MARA).

Being the university under the Ministry of Rural and Regional Development (KKLW) Malaysia, and as one of the leading technical universities in Malaysia, UniKL offers high-quality programmes in its 12 branches located in the west coast of peninsular Malaysia.

UniKL was conceptualised as "one institute, one specialisation" - each branch owning a specialised discipline. It emphasises on research and development for commercialisation.

Universiti Kuala Lumpur Malaysian Spanish Institute (UniKL MSI), situated in Kulim Hi-Tech Park, is a UniKL branch established to meet industry demands, especially in technical engineering.

It collaborates with Spain and partners with Feiran Technology Sdn Bhd and Dassault Systemes, offering Product Lifecycle Management (PLM) Professional Certification Programme for all MARA students in fields of mechanical engineering, especially automotive.

UniKL MSI has comprehensive Bachelor and Diploma programmes in three sections, namely Mechanical, Manufacturing and Electrical in its five diploma programmes.

Mechanical Section offers Diploma of Engineering Technology in Mechanical Design

and Development programme.

It runs for six semesters and covers mechanical products, mould fixtures and general parts with knowledge in material and manufacturing.

Meanwhile, the Manufacturing Section deals with the Diploma of Engineering Technology in Mould Manufacturing and Diploma in Engineering Technology in Production.

Electrical Section offers Diploma of Engineering Technology in Automated Regulation and Control (ARC) and Diploma of Engineering Technology in Electromechanical Installation and Maintenance (EIM). Both programmes prepare graduates with technical skills and regulation system of machines or industrial processes.

Graduates are exposed to a wide knowledge of distribution installation, control programmes of electro technical automation equipment, control and regulation system of machines or industrial processes.

UniKL MSI graduates will also be skilled in management, business practices and entrepreneurship. UniKL MSI shares technology and expertise with Spain with hi-tech workshops and laboratories. It specialises in the automotive industry and supports the rapid growth of this industry.
